

**UnLtdWorld enables social entrepreneurs, socially-minded people and socially-driven organisations to share, shape and use social insight to generate greater positive impact in the real world.**

## Overview

---

On UnLtdWorld you can connect with other socially-minded people, browse resources and opportunities, find and list services and products, share answers to key questions, create and join groups, promote and find events and lots more.

On the site you can control which information you share, set how it's displayed and who can see it. Anyone with a valid email address can register and create a profile on UnLtdWorld.

UnLtdWorld is supported by UnLtd - the Foundation for Social Entrepreneurs. UnLtd's mission is to reach out and unleash the energies of people who can transform the world in which they live. We call these people social entrepreneurs.

UnLtdWorld is powered by Curverider on their Elgg platform.

## Core

---

**Dashboard** - The core of the site is a dashboard, through which a member can easily navigate and interact with the site's different elements, connect with relevant content and other members through constantly updated information and news. Updates are targeted around content related to a member's network and their site activity and interaction.

**Profile** - Profiles are developed as a page to contain all the information relevant to a member, their project and their interests. Members are also able to see content that other users have found useful from across the site and send messages through a comment wall.

**Research Lab** – The UnLtdWorld Research Lab is the world's largest focus group of social entrepreneurs, and the first dynamic mapping and graphing of social entrepreneurship to directly integrate into a social network. The Research Lab also operates as an open development platform allowing any individual or organisation to access, mash-up and use the data for external projects, with external datasets and to inform targeted applications that interact and interoperate with any social graph or network.

## Applications

---

**Resources** – On UnLtdWorld users can search and share resources, such as toolkits, documents, events, funding information and organizations. Each resource has a dedicated page where relevant content can be added to ones profile and shared with others.

**Services & Products** – Users are able to find and list services and products. The section lists both services and products offered by members and by external providers. All content can be filtered by tags, categories and popularity, linked to groups, shared with friends and added to one's profile..

**Questions & Answers** – Q&A is a forum through which any user can ask a question to their network of friends, or to the entire community, and anyone can answer the query. All questions and answers can be filtered by topic and issue and tracked via ones profile.

**Events** – Members can find events to attend and create pages for the events that they are organising. Each event has a dedicated page, which incorporates information relevant to location, venue, date, attendance and photos. Events can also be attached to groups.

**Groups** – Members can create, search and join groups, these include an internal messenger, document archive and comment wall. Groups can be public or private and are linkable to projects and can be navigated by and associated to categories.

**Photo Gallery** – Members can upload and share photos on the site, collecting these in a gallery or linking images to specific content such as events and groups.

## Features

---

**Neighbourhoods** – In addition to befriending other members, UnLtdWorld users can easily see other members who have similar interests, who interact with the site in a similar way or could potentially be a relevant connection (e.g. provide a service one is looking for).

**Let's Meet Up** - Through this feature a member is able to communicate a city they are going to, and when they'll be there. All members in that location receive a notification on their profile, and consequently have the possibility to contact that user if they feel it would be valuable to meet up.

**Shout Box** – A micro-blogging platform for members to share opinions, stories and relevant links.

**Comment Wall** – A forum built into each users profile for other members to post comments for that user. A user has the possibility to set different access level options.

**Internal Email** – A place to send, receive and store private messages between members. Messages are visible only to the recipients.

**Favourite Content** – The option for users to save relevant content to their profiles or conversations within the site that they wish to track in time.

**Share** – A browser bookmarklet to easily share relevant content and links from other sites and to microblog from anywhere on the web.

**Clickpass** – An OpenID authentication system that allows members to register and sync their UnLtdWorld account details with other popular services or to use these to log into UnLtdWorld.
